Link Annotations

This fixture exercises both internal and external link annotations. The PDF must emit `/Annots` entries with `/Subtype /Link` for each `<a href>` with a non-empty href.

External link: visit example.com.

Internal link: jump to bottom on page 2.

Filler box to push the bottom anchor onto a separate page.

More filler.

Even more filler.

Filler so the destination is below the page boundary.

Last filler.

Bottom Anchor (page 2)

The internal link above should resolve to this heading on page 2. back to top.
