Top-Level Heading

This fixture verifies that h1/h2/h3 headings register as PDF outline entries via the bookmark UA CSS. The PDF byte stream contains the `/Outlines` dictionary; if outline emission regresses, the byte-eq comparison catches it.

Subsection One

A subsection under the top heading. Should appear as a child of "Top-Level Heading" in the PDF outline tree.

Sub-subsection 1.1

A nested heading at level 3.

Sub-subsection 1.2

Another nested heading.

Subsection Two

Sibling of Subsection One.

Second Top-Level Heading

This page-2 heading should also appear in the outline at the top level.

Page 2 Subsection

Final entry. Outline must include all 7 headings: 2× h1, 3× h2, 2× h3.
